

Maintaining Health and Safety

It is our absolute mission to ensure the safety of your children and our staff. We adhere and go beyond the guidelines outlined by the Center for Disease Control (CDC) and local health departments. Administrative staff complete daily wellness check and health screenings on both staff and children while following the regulations for infection control practices. This includes routine disinfection of all classroom materials, surfaces and playground equipment. We will also continue maintain separate groups as much as possible. Children and their belongings are adequately spaced for social distancing and outdoor shoes are not worn in classrooms.
